

INVITATION

We kindly inform that the Consortium composed of Fabryka Samochodow Osobowych Syrena w Kutnie Spolka Akcyjna and mPower Spolka z ograniczona odpowiedzialnoscia and Ekoenergetyka-Polska Spolka Akcyjna realizes on behalf of the National Centre for Research and Development a pre-commercial project titled "**e-Van – Universal Delivery Vehicle with electric drive category N1**".

The project entitled "Design, construction and examination of a universal hydrogen vehicle characterized by high primary energy efficiency and innovative on-board systems" carried out by the Consortium assumes the creation of an innovative and unrivalled delivery vehicle using a hydrogen fuel cell as a source of electric energy.

Basic parameters:

- Weight: up to 3.5T,
- Load: 1,000.0 kg,
- Range: 450 km.

The dedicated recipients of the project are the companies from the logistics and courier industries, as well as those providing services such as roadside assistance.

Stage I of the above venture has been completed (26.01.2021) which resulted in the concept of the vehicle in question.

We kindly ask all entities interested in the above solution to submit bids for granting by the Consortium a non-exclusive and paid license to use the results of R&D Work and the objects of Background IP.

The above notice shall be valid for a period of not less than 10 years from the completion of Stage I.
